

Adobe Audition Content Download Page

Current Page: <http://www.adobe.com/special/products/audition/loopology.html>

Overview:

Audition has lost Resource Central for content downloads of sound effects, loops and music beds, thus the approved transition plan is to repurpose the page at the URL above in order to create a similar page at a different URL (following successful creation of this new page, the old page above would be decommissioned).

Information for creating the new page is listed below including on page copy, notes on the files to be listed for download and the GO URL which will be used in the application to direct users to this page. Lastly, legal text will be required in order to allow users to direct themselves to the EULA for Adobe content downloads.

Security:

Page should be behind an Adobe ID login such that the page itself AND the zip files downloaded require AdobeID login (if possible).

Page Go URL:

NOTE: Currently this GO URL points to Audition product home page (will request redirect once new URL is in place). This only appears in Audition CS6 help menu at the moment, but will be shared with other product teams such as Premiere Pro once we have confirmation of new URL.
